

Saideep originated as a family project conceived by Dr. Deepak S.S in early 2012. The concept quickly garnered interest from esteemed colleagues, who enthusiastically joined the initiative. In no time, they embarked on a journey from conceptualization to realization, witnessing the transformation of their dream into the current success. Saideep has consistently delivered across all facets of the medical fraternity.

What sets this project apart is the migration of consultants, each bringing their established credibility and infrastructural resources to Saideep after concluding their previous ventures.

Their unwavering commitment to the visionary leadership of Dr S.S.Deepak in the healthcare domain and a dedicated pursuit of enhancing lives through outstanding clinical quality are the driving forces that keep Saideep standing strong and propelling forward!
